Filled by Sundridge Search – VACANCY CLOSED – Cable Accessories Technical Services Manager (£65000 – £75000 basic plus benefits)

Description

Our client are a worldwide industrial Group specialising in products and services relating to the transport and distribution of electrical energy. Our client are looking to strengthen their technical/ commercial team by adding a Technical Services Manager.

Despite the job title of the role, the position is a sales position as well as a technical position!

The principal role of the Technical Services Manager is to work closely with both our clients engineering and commercial teams and organise, prepare, facilitate, document and follow up on all topics raised during the 'Engineering Sales Growth Workshops' with our clients UK customer base whilst continuing to build on their strong working relationships.

It will also be a requirement to continue to practice 'Voice of the Customer' whereby you need to listen to what the customer wants and by working alongside other departments, provide technical and commercial product solutions that meet customers' requirements. This will require the need for excellent communication with not only our clients customer base but also with both our clients engineering and commercial teams.

Good product presentation skills are also required both by way of on-site practical demonstrations but also product awareness training by way of classroom powerpoint presentations.

In addition to the above you will be expected to identify new business opportunities/diversification and these could include new markets, growth areas, tends etc and to regularly report these opportunities into Engineering Sales Meetings.

The successful candidate must be based in the South East of England or must be based in North Central England (along the M62 Corridor).

Responsibilities

- To build strong working relationships with new customers, gauging their needs and developing proposals to address them
- To maintain and further develop relationships with the current customer base in the UK, Europe and worldwide
- To identify new business opportunities, including new markets, new customers and partnerships
- To frequently visit existing and/or new customers by way of the organisation and implementation of on-site 'Engineering Sales Growth Workshops'
- To demonstrate existing and new products to new and existing customers
- To attend Electricity Supply Industry (ESI) conferences/ seminars and
